

LAMPIRAN 3. Information Required for Seed Introduction (Genetic Material Importation) to Indonesia

Information Required for Seed Introduction (Genetic Material Importation) to Indonesia

(to be completed by Seed Company, owner of the variety or grower)

1. Common name :
 - Botanical name :
 2. Name of Variety/cultivar :
 3. Type of variety (choose one) : hybrid; pure line; syntetic; clon
 4. Genome status (choose one) : transgenic; non transgenic
 5. Type of Genetic Material (choose one) : Seed, Seedling, Pollen, Cutting, Tissues
 6. Status of variety/cultivar :
 7. Protection type :
 8. The origin of site : a. When and where the seed is produced?
b. When and where (state, country/town) the variety?
 9. Exporter : a. The original country of sender (exporter)
b. Name, Address (phone, fax, email/telex) of company/producer:
 10. The company, person and address of importer:
 11. Plant description/characteristics:
 12. Spesific characteristics or novelty of this variety (incl, quality, etc)
 13. General requirements for growing this variety
 - Suitable temperature range :
 - Suitable day length :
 - Pest list in its growing area :
 - Disease list in growing area :
 14. a. Yield of productivity (if applicable)
b. Day from planting to first harvest:
c. Suggested for plant spacing :
d. Population of plant per 100 m2 :
 15. a. Tolerance (T) or susceptibility (S) to disease, if any:
b. Tolerance (T) or susceptibility (S) to pests, If any:
 16. Seed quality:
 - a. Purity :%
 - b. Germination :%
 - c. Expiring date :%
 - d. Location of seed farm :
- Company :
Sender :
Signature :
